HIGH-PERFORMANCE FIRST RESPONDER UNIFORMS DESIGNED FOR COMFORT & BUILT TO LAST

Hard-working, durable LION StationWear™ shirts, pants and jackets designed specifically for firefighting and emergency professionals

With a history of producing high-quality uniforms that dates back to 1911, LION StationWear for first responders is engineered for easy care, maintenance and long wear. These garments build on the traditions of the past with strength and performance to stand up to the daily rigors found in today's demanding and unpredictable workplace.

With LION StationWear, you get:

- Designs with features that facilitate job performance.
- Construction and reinforcements that meet the challenges of your job head on.
- Wicking fabrics that transport sweat away from the body and toward the bunker gear's breathable moisture barrier.

NFPA 1975 Compliant

The underlying purpose of NFPA 1975 is to provide uniforms that are thermally stable and do not contribute to burn injury severity. Our NFPA 1975-compliant uniforms are made with fabrics, pocketing, labels, waistbands, zipper tape and sewn with thread, all certified to meet this requirement. LION StationWear garments are independently audited and certified.

Lifetime Warranty

LION StationWear is built to last. For durability, versatility and styling features, it is unequalled and warranted. All LION StationWear products are warranted to be free from defects in material and workmanship for the life of the garment.

KEY SHIRT & PANT TAILORING HIGHLIGHTS

THE DIFFERENCE IS IN THE DETAILS: LION StationWear products are specifically designed for activities performed by professional firefighters and medics.

We recognize that your station/work uniform serves more than just an identity function. It is a personal part of the protective ensemble. That's why each LION StationWear garment is engineered to maximize safety and promote professional pride.

You can count on LION StationWear to provide **maximum freedom of movement, comfort, utility** and **long-lasting good looks**. Each garment, regardless of style, features high-quality tailoring details that improve its performance and value. We even put in extra bartacks and seams at common failure points.

BUTTON-FRONT SHIRTS

A. Epaulets*

- Fully-lined with fusible liner to maintain crisp appearance after each wash
- Sewn into shoulder seam and finished with a symmetrical "X" box stitch

B. Collar

- Fully-lined with fusible liner
- Permanent collar stays horizontal to the collar edge to ensure crisp appearance
- Topstitched edges for reinforcement

C. Badge Holder & BadgeTabs (Optional on select styles)

- Reinforced eyelets
- Internal support sling is sewn into the shoulder seam
- Optional 1" x 2" badge tab with reinforced eyelets sewn on to left chest on select styles only

D. Pocket Flaps

- Flaps are fully-lined with Dacron to maintain crisp appearance after each wash

E. Sleeve/Cuffs

- One-piece sleeve set to shoulder with a double-needle safety stitch
- Short-sleeved hems are bartacked for reinforcement
- Cuffs lined with Dacron for additional stability and crisp appearance
- Cuffs have two buttons spaced horizontally 1" apart for adjustable fit

PANTS

A. Front Pockets

- Quarter top openings with extra wide pocket facing
- Triangular bartack reinforcements at top and bottom points of stress to prevent pockets from splitting at corners through normal wear and tear
- Pocket bottoms reinforced (3.5") with a second layer of pocketing, adding twice the strength by doubling the layers

B. Front Closure

- Double hook and bar allows trousers to remain in service longer
- Both bars stabilized and reinforced by bartacks and interlined backings
- Fully-lined grown-on french fly takes pressure off of double hook and bar
- Fully-lined fly with bartacked reinforcements
- Ratcheting brass zipper stays in place

C. Inner Construction & Additional Features

- Double-folded thickness crotch lining absorbs perspiration and reinforces inseams at high stress area of trouser
- Extended fly tail provides superior reinforcement by connecting all four panels of trouser together at greatest point of stress
- Permanent silicone creasing for superior crease retention with minimal maintenance

D. Back Side

- Double welt construction with topstitching to reinforce pocket opening during use
- Triangular bartack reinforcements at side edges to prevent pockets from splitting at corners through normal wear and tear
- Button tab closure on left pocket
- Belt loops are stitched with a double needle and lined. They are also set into waistband to prevent fabric around area at bottom of belt loops from weakening

Nonex®

Tecasafe®

100% Cotton

Poly/Cotton

StationWear Fabric Options

DUPONT™ NOMEX® IIIA 
Aramid fiber manufactured by DuPont. Blend of 93% Nomex®, 5% Kevlar® and 2% static dissipative fiber

- Inherently flame-resistant – won't melt, drip or support combustion in the air
- FR cannot be degraded by laundering
- Superior color fastness
- Char length less than 4"
- Moderate moisture regain
- Easy to maintain
- Very low shrinkage
- Color can change with overexposure to UV
- Should not be considered where critical static control is required
- Estimated wear life: 4 years

TECASAFE® 
Blend of 55% FFR (Fibrous Flame Retardant Fiber) and 45% combed cotton manufactured by Westex Fabrics

- Inherently flame-resistant
- FR cannot be degraded by laundering
- Char length less than 6"
- Excellent moisture regain
- Shirts require at least "touch-up" ironing
- Low shrinkage
- Good color fastness
- Should not be considered where critical static control is required
- Estimated wear life: 2 years

100% COTTON 
Natural fiber taken from the cotton plant

- Known as the "comfort" fiber
- Untreated cotton has no flame-resistant properties. 100% untreated cotton fabrics will ignite and burn quickly, but will not melt
- Good moisture regain
- Requires ironing
- Tends to wrinkle, fade and shrink due to the nature of the fiber. LION cotton fabrics have special dye and finishing methods to improve color fastness and wrinkle resistance
- May be considered where critical static control is required
- Estimated wear life: 1 year

POLY/COTTON BLEND
65% polyester/35% cotton

- No flame resistance and will melt under high heat
- Moderate moisture regain
- Should not be considered where critical static control is required
- Requires at least minimal ironing
- Very low shrinkage
- Good color fastness
- Estimated wear life: 2 to 3 years

TAKING THE HEAT & GOING THE DISTANCE

WHY CHOOSE DUPONT™ NOMEX®?

DuPont Nomex delivers reliable, heat and flame resistant performance for increased confidence in the face of dangerous conditions. Built on a 50 year trade record, Nomex provides proven, lightweight and durable solutions to the fire services industry.

Nomex Performance Advantages:

- Meets NFPA 1975 Standards
- Self extinguishes
- Won't melt or drip
- Low fabric shrinkage during flame exposure reduces the chance of skin contact with hot fabric
- Non-toxic when heated to flame temperatures
- FR qualities remain throughout the life of the garment – they won't wash or wear out

Great Styles, Great Comfort

LION's classic time-tested styles maintain their shape and fit for comfortable 24-hour wear. Uniforms made of lightweight Nomex IIIA are used by many departments in the hot, humid climates of the southern United States with excellent results in terms of comfort and breathability. Inherently flame resistant for superior performance.

Easy to Maintain, Always Looks Great

LION StationWear Nomex IIIA uniforms are literally wash and wear. They can be laundered using normal, commercial laundering or dry cleaning techniques. Because the flame-resistant protection is part of the fiber, the protection cannot be washed or worn out.

Long Wear Means Cost Savings

LION's Nomex StationWear also exhibits greater abrasion resistance, low shrinkage and color fastness. This translates into superior durability. The average wear life of LION Nomex StationWear is between three and five years. Compare that to one year for cotton or two years for FireWear. While the initial cost for a garment made with Nomex fiber is more than other fibers, it is significantly less expensive in the long run. Over a four-year period, the total cost (initial price and replacement costs) for 200 sets of shirts and pants of cotton is about \$72,000. Garments made from Nomex are just \$38,000 (see Figure 1).

WOMEN'S CUT SHIRTS & PANTS
**ESPECIALLY MADE
WITH FEMALE
FIRST RESPONDERS
IN MIND**

LION understands that it can often be challenging for female firefighters and emergency medical technicians (EMTs) to work in station uniforms that are designed to fit men. For that reason, we also offer StationWear shirts and pants that are specifically designed for female body types. Delivering uncompromising comfort, safety and durability, our high-performance, NFPA 1975-compliant StationWear for women stands up to the rigors of the job, while also providing the particular fit and mobility female first responders need to get it done.

Our women's StationWear features:

- Female shirt and pant sizes
- Tailored shirt back designs for true female fit
- Female-style (right-to-left) dress shirt front placket button closure
- Female-sized shirt sleeve lengths for better fit and range of motion
- Lowered pant waists for increased comfort
- Adjusted pant inseams that better accommodate the female figure

 - Reinforced double layer front pockets
 - Permanent silicone creasing

ADDING THAT PERSONAL TOUCH

LION CUSTOMIZATION OPTIONS

Adding personalization and identification are final touches to your LION StationWear, and customizing your station uniforms is more than decoration. It's functional – communicating authority and professionalism with each interaction you have with the members of the community you serve.

LION StationWear offers complete identification and personalization services - including **embroidery**, **emblems**, **screen printing** and **reflective transfers**.

Measuring Guide

Have someone else measure you. Keep tape straight, but not tight. Measure over undergarments or other clothing that will be worn under your uniform. If your measurements fall between two sizes, order the larger size.

Measuring Men

CHEST: Measure around the fullest part of chest, keeping tape up under arms and across the shoulder blades (See Measurement A).

WAIST: Measure around waist over shirt (not slacks) at position you wear slacks. Keep one finger between tape and body. Or, measure the waistband of a well fitting pair of similar slacks, zipped and closed (See Measurement B).

SLEEVE: Measure from center of neck at back of collar, over the shoulder, along arm, behind elbow, to wrist bone. Or, take marked sleeve length sizing from a dress shirt that fits you properly (See Measurement C).

INSEAM LENGTH: Lay well-fitting, similarly styled pair of slacks flat with crease at back and front. Lift one leg and measure from crotch seam to bottom of slacks leg (See Measurement D).

CENTER BACK LENGTH (CBL): Measure from the center bottom of the outer collar band to the center point of the end of the tail. (See Measurement D).

NECK: On a shirt that fits you well, lay collar flat. Measure collar from center of collar button to far end of collar buttonhole (See Measurement L). Or, measure comfortably around neck.

Measuring Women

BUST: Holding tape gently, measure around fullest part of bust. Keep tape straight and level (See Measurement F).

WAIST: Measure around the smallest part of natural waistline. Hold tape firmly, but not tightly. Keep the tape level and be sure to stand naturally (See Measurement G).

HIPS: Measure around the fullest part of hips. Hold the tape measure firmly, but not tightly Keep the tape measure straight and level (See Measurement H).

INSEAM LENGTH: Lay well-fitting, similarly styled pair of slacks flat with crease at back and front. Lift one leg and measure from crotch seam to bottom of slacks leg (See Measurement J).

CENTER BACK LENGTH (CBL): Measure from the center bottom of the outer collar band to the center point of the end of the tail. (See Measurement K).

NECK: On a shirt that fits you well, lay collar flat. Measure collar from center of collar button to far end of collar buttonhole (See Measurement L). Or, measure comfortably around neck.
